

16-17 February | Free Online Event

TUESDAY 16 FEBRUARY 2021

SESSION TOPICS ARE SUBJECT TO CHANGE

09:00 ET **MEASURING THE VALIDITY OF VOC WITH COVERAGE & RESPONSE RATES AT PHILIPS**

If your stakeholders are tangled up in NPS benchmarks across industries and markets, then you've already lost focus on the goal, which is the customer! While top customers frequently give terrible NPS scores, they can still be the highest revenue generator as their feedback is consistently actioned. In this session, discover how to increase your response rates and coverage, and create change using the true voice of the customer.

- Benchmarking yourself against historical performance
- Evaluating targeted feedback such as behavioural triggers
- Feeding customer data back into the business to drive change

Jay Callery, D2B Voice of the Customer Specialist, **Philips**

11:00 ET **IMPROVE PRODUCT EXPERIENCE BY STREAMLINING CUSTOMER FEEDBACK DATA WITH VOC**

A leading music streaming service needed to better understand the needs of their users, however were unable to drill down on the customer experiences due to process inefficiencies and high impact product bugs. In this session, discover how VoC tools provided a holistic view across all feedback sources and languages, while identifying actionable data insights for product improvements. Removing manual overload and reducing errors

- Streamlining user feedback in a centralised location
- Identifying real time feedback of product quality issues
- Prioritizing high impact quality issues

Anthony Heckman, Head of Growth, **unitQ**

WEDNESDAY 17 FEBRUARY 2021
