<p>8:45 am EST</p>	<p>Midstream Operational Excellence: Meeting New Challenges – and Opportunities - to Emerge Stronger Than Ever</p> <p>Midstream companies in face a challenging environment today. Operational excellence is as important as ever, but the current market dynamics demand more. We must operate more efficiently than ever while maintaining high safety and environmental protection standards, new business models, service excellence, and top-tier data capabilities are needed to win. This executive panel will bring together business leaders to shine a light on what it’s going to take to drive digital transformation forward.</p> <p><i>Ravi Srivastava, Vice President, Data and Operations Technology, CNX</i> <i>Grigor Bambekov, Senior Vice President, Business Transformation, Delek US Holdings, Inc.</i> <i>Biju Misra, Director, Operations- Corporate Business Services & Automation CoE, Enbridge</i> <i>Panel Moderator: Jennifer Rogers, Former Head of Learning, AngloAmerican</i></p>
<p>9:45 am EST</p>	<p>Business Value Drives Digital Transformation for Pipeline Operators</p> <p>The O&G Midstream industry is under tremendous pressure with the need to continually improve operational safety, keep up with regulatory requirements, and be more agile in response to a rapidly changing business climate and the global sustainability challenge. Pipeline Operators are initiating digital transformation initiatives as a crucial element of Operational Excellence programs that are fundamental to success in this environment. AVEVA believes IIoT/Edge, Big Data, AI, Cloud, Digital Twin and Connected Worker are the key technologies for digital transformation success. We will discuss strategy development and acceleration of your digital transformation journey and provide a couple of success stories as concrete examples.</p> <p><i>Wayne Rutledge, Senior Product Manager, Oil & Gas Pipeline Midstream Solutions, AVEVA</i> <i>Richard Martin, VP Digital Acceleration, AVEVA</i></p>
<p>10:30 am EST</p>	<p>Artificial Intelligence (AI) for Midstream Safety Solutions: Increase Safety, Compliance and Process Efficiency, While Mitigating Risk</p> <p>The need for effective compliance for midstream energy organizations has never been greater. Regulatory bodies from the Department of Energy to the Pipeline and Hazardous Materials Safety Administration (PMHSA) are becoming more vigilant in their enforcement and the cost of non-compliance are significant.</p> <p>Midstream companies can harness the power of artificial intelligence (AI) to optimize their compliance processes, reduce costs, and achieve a comprehensive understanding of their exposure to noncompliance risk.</p> <p><i>Bryce Bjornvick, Founder, Midstream Process Solutions, Inc.</i> <i>Yingchao (YZ) Zhang, Vice President Of Business Development, Singularity Systems Inc.</i> <i>Michael Grant, Vice President North American Sales, Singularity Systems Inc.</i></p>
